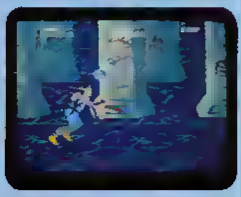
Unbreakable shield made of super metal. Pick it up and use it to your advantage against enemy warriors.

BARRIER

Rapidly move your shield and a barrier will protect you.

RED SWORD



Collect all swords thrown at you and you will becomean invincible warrior.

THE GREAT GURIANOS

The Great Gurianos PCB uses some of the latest and most sophisticated technology available in the world today. Three separate CPUs are used to produce some of the most advanced graphics, images and sound. Each CPU functions together for quick player response and operator reliability.

Up to 320,000 different colors can be generated, and the FM sound generator has the capacity to reproduce sounds never before heard on a video game. The advanced technology used in this PCB system enhances the game play and gives the board system the capacity to provide the player with a mulititude of features.

Game Scenario

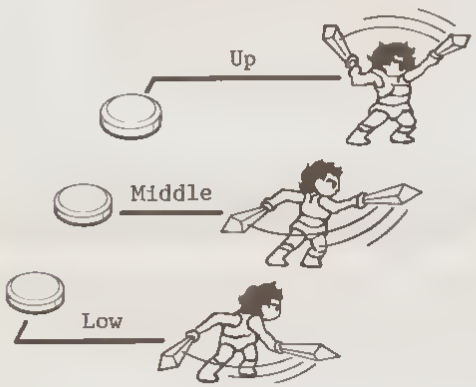
Travel with the Great Gurianos ashe battles his way through 4 stages against some of the toughest and most feared warriors ever to be found anywhere. When Gurianos is fully armoured the player may create a momentary protective shield by rapidly moving the joystick up and down.

Pick up all 4 flying swords at the beginning of each stage to turn Gurianos' sword RED. If the player is then able to hit an opponents' shield 14 times with his RED SWORD, his armour is momentarily charged up to a glowing GOLD color and his opponents can't harm him.

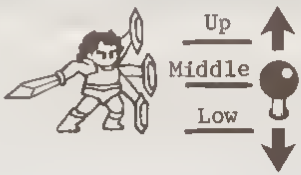
Break the Magic Crystal Balls to replenish Gurianos' armour.

Each opposing warrior has his own personality and way of fighting. Irene is vulnerable when she strikes at the player's chest armour. Zenon is most vulnerable when you trick him and make him laugh. Each opponent has his strengths and weaknesses and its fun and challenging to the player to learn each of them.

Press one of the buttons to select position of the sword.



Operate the joystick to move "Gurianos" back & forth.



Operate the joystick to fix the shield in position.
